

Science, Technology and Society Relationships

Society

'Inventions'

(e.g., electronics,
mechanics, chemicals,
bio-technologies, etc.)

Science

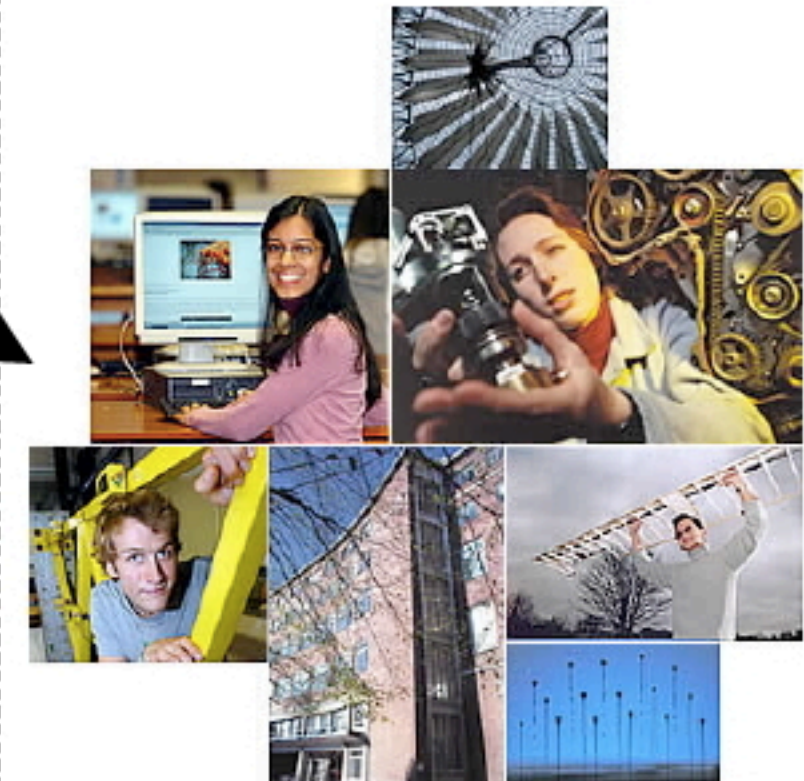

Scientists are said to: share their methods and findings, allow all scientists to work in science, unbiased (not favouring any one topic, method, result, etc.), always report new findings (not copying other scientists' work), and always double-check their methods and results and that of other scientists.

'Discoveries'

(e.g., laws, theories, etc.)

Technology

engineering design
